

INVESTING IN TODAY'S MARKET

This presentation will focus on what's happening in the markets. We will highlight current economic activity and trends and discuss what developments to look for in the coming months. From key economic indicators to waiting and listening to guidance from the Federal Reserve, we will offer insight with respect to today's investment landscape. We will also highlight investment strategies and provide an overview of activity in the equity, fixed income and alternative investment markets

LEARNING OBJECTIVES

Explain an understanding of key economic indicators
Provide an overview of historical and projected interest rates

Provide an understanding of current trends in the domestic and international equity markets

MAINSTREET
ADVISORS
